

## Cybersecurity Development in the Arab region

[UNESCWA - ITU Arab Office]

### Description

The International Telecommunication Union (ITU) aims to improve the cybersecurity readiness, protection, incident response capabilities and awareness of Member States by conducting CyberDrills at the national, regional, and global level.

The main aim of this session is to

- Bring together the regional cybersecurity community to review major regional cybersecurity trends and consider improvements based on the five pillars of ITU Global Cybersecurity Agenda (GCA) and The Global Cybersecurity Index (GCI).
- Highlight the importance of regional Cooperation whether bilateral or multilateral and its benefits for all member states.
- Strengthen the regional cooperation and keep abreast of current trends, good practices, innovative approaches, lessons learned, and to identify common challenges across regions.

### Objectives

The main aim of this session is to:

Bring together the regional cybersecurity community to review major regional cybersecurity trends and consider improvements based on the five pillars of ITU Global Cybersecurity Agenda (GCA) and The Global Cybersecurity Index (GCI).

Highlight the importance of regional Cooperation whether bilateral or multilateral and its benefits for all member states

Strengthen the regional cooperation and keep abreast of current trends, good practices, innovative approaches, lessons learned, and to identify common challenges across regions.

#### Moderator:
